Logistics and Engineering Center

SUBJECT: Letter of Commendation

Mr. Jarod Jenson
Aeysis, Incorporated

Dear Jarod:

I would like to thank you for your skillful use of DTRACE to examine powerLOG-J's startup time at the 2005 JavaOne Conference. Using the information you uncovered, we were able to cut powerLOG-J's startup time from 20 seconds to 5 seconds. It would have been very difficult and time consuming for us to do this on our own, so all of us here are doubly impressed that it only took you 30 minutes.

Mr. Kopp is still disappointed that he did not win a free iPod, but I am sure he will get over it. We are looking forward here to getting some Solaris 10 machines so we can use DTRACE ourselves, but if we ever run into a really nasty problem, we know who to call.

Sincerely,

Louis J. Sciaroni
Chief, Logistics Engineering Division
Logistics Support Activity
